

GENERAL INFORMATION

Faith clinic is located northwest of the capital city of Monrovia, in the township of Virginia. The clinic was built in order to save lives in and around the community. Faith clinic is one of the most outstanding clinics in Virginia township. The community in which this clinic was built has a population of 500 people. The clinic has an open top well that serves both the community and clinic. They use buckets to draw the water from the well.

Most of the people in this area are farmers or self employed. The LWI Liberia team rehabilitated the well by cleaning it out, closing the well, putting in a pump base and chlorinating the well. The team also built a concrete apron and installed a new India Mark II hand pump. Faith clinic and the community now has a clean, safe source of water. The team instructed the people how to keep the area around the pump clean along with how to wash their hands properly and how to properly store water.
